2023 Tesla Model Y

Long Range AWD

 VIN
7SAYGDEE0PF898589

 Odometer
9,270 miles

 Original Battery Capacity
81 kWh

93

Range Score: Excellent

Range Score provides an estimate of how far this vehicle may drive on a full charge today versus when it was new.

-  Estimated Range Today
300 - 302 miles
-  Estimated Range in 3 Years
285 - 286 miles
-  Original EPA Range
330 miles

Seasonal Range

Your likely range in the typical weather for Los Angeles (90063) is 187 - 260 miles.

Insights

Range is likely to be lowest in September

We use thousands of observations from other Tesla Model Ys to predict your most likely Real-World Range as the distance between full charges in your local weather conditions.
